

SOLID LINE
DIECUT

GLUE AREA

NON-PRINT AREA

If designing within Illustrator, open the .eps file and create your artwork on the **ARTWORK** layer.

If designing within another design application:

- Create a document sized to 16 in x 9.5 in.
- Create a layer for the die trace and a layer for your artwork.
- Place the .eps die trace on the die trace layer with upper left x and y coordinates at x: 0 in and y: 0 in.
- Lock the die trace layer.
- Create your artwork on the layer you created for your artwork.
